Slides 2-5: 3 Things I Did Differently My Second Time Taking the Bar Exam

Slide 7: Giveaway

- Details and link
- Winner gets close to \$700 worth of tools for free

1) Lectures are worthless (clickbait)

- Depends on your learning style
- Conscious approach
 - Are you watching because you're supposed to or because you're using it as a learning tool?
 - Apply to everything you're doing
 - Optimize for learning rather than completing tasks
- Don't play defense

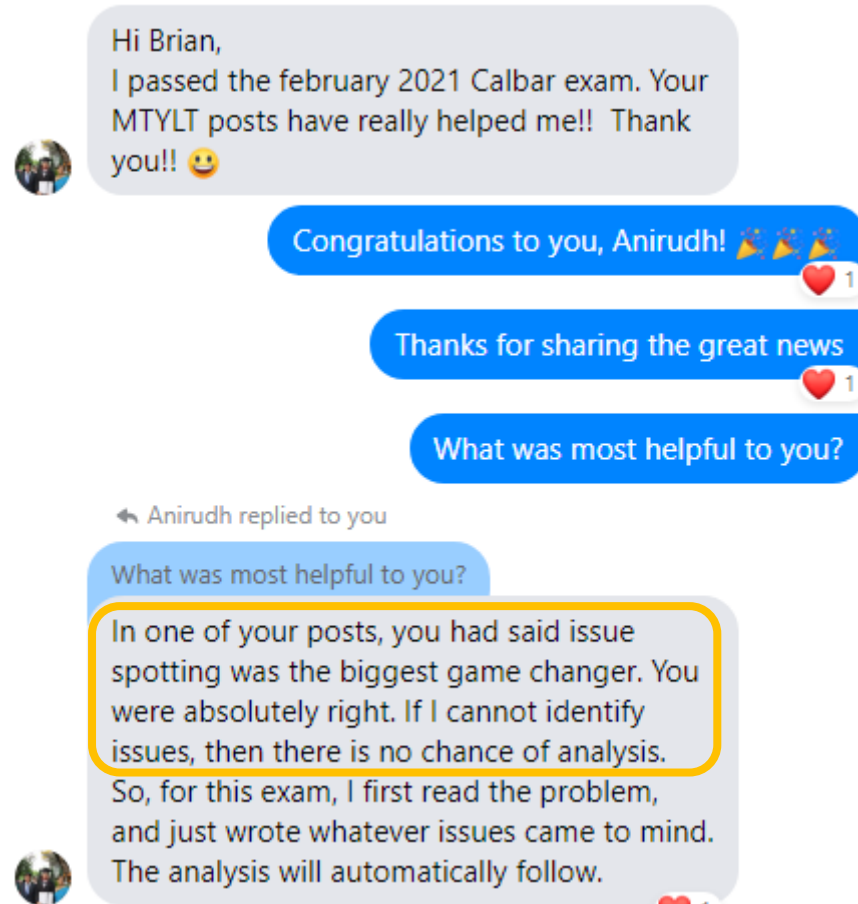

2) Upgrade MBE approach

- Quality > quantity
- Track performance by smaller categories
 - By subject
 - By big issues
- Practice with a mix of real MBE questions and other styles of questions
 - Emanuel's [Strategies & Tactics for the MBE](#)
 - Simulated questions from prep course
 - UWorld / AdaptiBar
 - Review: <https://www.makethisyourlasttime.com/uworld-mbe-review/>
 - Coupons: **BHMBE25** for 25% (\$87) off UWorld / **MTYLT30** for \$30 off AdaptiBar

3) Essays: issue checking

- ISSUES are most important
- Rather than thinking of it as spotting issues, you are now *checking* for issues
 - “Spotting” = “I just happened to see it in its natural habitat”
 - What you want is a finite list of testable issues
 - <https://www.makethisyourlasttime.com/issue-checking-not-issue-spotting/>

3) Essays: issue checking

There's nothing sacred here

- It's OK to not reinvent the wheel. Use the past to guide your future
- Your DUTY to give yourself every advantage you can. Duty to self and public to pass
- Email just a tool, no need to inbox zero. Prep course just a tool, no need to complete everything. Tool serves you

Giveaway
